  Electronics
- Which region generates the highest revenue?

  NORTH
- Which store has the highest sales?

  STORE 8

2. Diagnostic Analytics

- some product categories performing better than others
- Due to discount vary one region generate less revenue than another
- There is a relationship between discounts and average order values
- The number of stores affect regional sales performance due to all region have 6 stores but west only have 2 stores so the revenue will differ

3. Predictive Analytics

- The expected revenue for the next three months will increase little bit
- with electronic and home product categories may generate higher sales in the future
- west regions may need more attention to increase the number of store based on past sales history

4. Prescriptive Analytics

ANALYSTIC TYPE	FIND OUT ISSUE	RESULT
Descriptive	Category wise sales	Electronics category is the highest sales point
Diagnostic	region wise sales calculated	North region has highest sales
Predictive	Total revenue	**263692.96 1284300.92 1003073.09** **2023 2024 2025** When compare all the years 2024 generated the highest sales revenue
Prescriptive	Sales improvement	Electronics is the high-performing category, so we need to identify ways to improve its sales further. Sports is the low-performing category, so we need to identify the issues

		affecting its sales and develop strategies to increase sales in all region.
